

Tasky

The simple task and time recorder

[docs](#)

[console](#)

[account](#)

Info

What is Tasky?

Tasky is a simple task and time recorder for your day to day activities. Themed around that of a terminal window it allows for fast insertion and retrieving of your tasks and data. Simple and fast! What more could you want?

Why use Tasky?

I was looking for apps and a way to save my day to day activity. Most apps I found were bloated with too many features, too many functions and low user experience. I just wanted something simple to record my tasks. Thats how Tasky was born!

Its free?!

No catch. Tasky is free to use for anyone looking for a fast way to record you day to day times and tasks. If you would like the ability to record more daily tasks and create more names for your tasks. Then have a look below!

Price

Free?

Functions as usual but with limited the storage space of tasks.

- Up to 5 task names.
- Up to 4 record per day.

\$0

Level up!

Functions as usual but with no limited storage space of tasks.

- Unlimited task names.
- Unlimited records per day.

\$14.99 per year

Footer.

Tasky

Welcome to Tasky the task recorder.

What is Tasky? Task is a terminal themed task / activity recorder.

We removed buttons, user interface and windows and gave you what you need. Simplicity.

This app will allow you to record your activity and the time spent doing it. Then, after inputting the command it can show you the percentage of time you have spent doing the activities either today, a certain date or a date range.

You can then view the data to see how much time you have spent on the tasks!

Please type `-help` for a list of commands to get your started!

Enter command
